Education

Xiamen University Malaysia <i>Bachelor of Engineering in Computer Science and Technology</i>	Aug. 2023 – Present Malaysia
Emobilis Institute <i>Certificate in Full Stack Software Development</i>	Jan. 2022 – Apr. 2022 Nairobi, Kenya
Mang'u High School <i>Kenya Certificate of Secondary Education (KCSE)</i>	2019 – 2022 Kenya

Experience

Research Assistant <i>Xiamen University Malaysia</i>	September 2025 – Present
- Engineered a full-stack academic management platform using React and Supabase to digitize postgraduate document workflows across students, supervisors and faculty administrators. - Designed and implemented a multi-role approval system with role-based access control, enabling structured submission pipelines for logbooks, service hours and academic progress reports - Built a real-time database schema in PostgreSQL with row-level security policies to enforce data access boundaries between user roles - Developed a Service Hours Tracking Module featuring cumulative monthly reporting, a color-coded calendar, and visual analytics via pie charts to monitor student progress. - Implemented a Document Modules with multi-status state machine (Draft → Submitted → Reviewed → Approved) supporting file uploads and structured academic documentation	
Software Developer & Co-Founder <i>Amanah Logistics</i>	May 2025 – Present
- Co-founded and built amanahlogistics.com, a SaaS logistics platform enabling businesses and courier companies to manage riders, assign deliveries and track shipments in real time - Engineered an auto-assignment algorithm to intelligently dispatch delivery orders to available riders, reducing manual coordination overhead using scheduler, optimizer, matcher and scoring functions. - Integrated Google Maps Places API for live route tracking and location-based delivery management across the platform - Designed and built RESTful APIs to power cross-platform communication between business web dashboards, courier management tools and rider-facing mobile application - Implemented real-time push notifications and search functionality to keep businesses and couriers updated on delivery status at every stage	
General Affairs Officer <i>School of Computing and Data Science, Xiamen University Malaysia</i>	Oct. 2024 – Present
- Managed logistics and inventory for student activities and events within the School of Computing and Data Science - Coordinated with academic staff and student council members to support departmental initiatives and student engagement - Organized and supported academic workshops, tech events, and student welfare programs	

Projects

Personal Portfolio Website | HTML, CSS, JavaScript

Jan. 2025 – Apr. 2025

- Designed and developed a dynamic personal portfolio website to showcase journey, projects, skills, achievements and personal blogs
- Integrated responsive design principles to ensure full accessibility across all devices and screen sizes
- Implemented modern web technologies to create an interactive, user-friendly interface with smooth navigation

Amanah Logistics Platform | JavaScript, Node.js, HTML/CSS, Kotlin

May 2025 – Present

- Built a full-stack delivery logistics platform with a basic (html, css and javascript) frontend, scalable REST API backend and real-time delivery tracking
- Designed relational database schema and integrated Google Maps Places API and third-party services for live location management
- Implemented an auto-assignment algorithm, push notifications and search to automate courier dispatch and improve operational efficiency
- Deployed the system fully on AWS ec2 instance.

POTA – Postgraduate Academic Management Platform | React, Node.js, PostgreSQL

Sep. 2025 – Present

- Solely engineered a full-stack platform to digitize postgraduate document workflows across students, supervisors, and faculty administrators
- Designed a PostgreSQL schema with row-level security (RLS) policies and a multi-role approval system with role-based access control
- Built a Logbook Module with a multi-status state machine (Draft → Submitted → Reviewed → Approved) and a Service Hours Tracking Module with visual analytics and a color-coded calendar

Technical Skills

Languages: JavaScript, HTML/CSS, SQL (PostgreSQL)

Frameworks & Libraries: React, Node.js, Supabase, AWS

Developer Tools: Git, VS Code, Google Cloud Platform, PostgreSQL

Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), REST APIs, System Architecture, Database Design, Responsive Web Design, Role-Based Access Control (RBAC)

Languages (Spoken): English (Fluent), Swahili (Fluent)
